Description

Lume Consulting Group, a **Sacramento-based IT consulting company**, is seeking an experienced **Enterprise Architect** to join our team in Sacramento. This role requires expertise in enterprise architecture, strategic planning, and IT systems integration. The ideal candidate will have strong leadership skills and a proven track record in large-scale IT projects.

JOB Location: ON-Site Sacramento,CA

Qualifications

Minimum Requirements:

- **Minimum Ten (10) years** of proven experience as an **Enterprise Architect**, with a strong understanding of enterprise architecture frameworks
- Extensive experience in designing and implementing IT architectures and strategies
- Strong knowledge of **IT infrastructure, cloud technologies**, and emerging technologies
- Excellent communication and stakeholder management skills
- Strong knowledge of innovative and emerging technologies, with the ability to provide actionable recommendations for technology investments and implementations.
- Experience in designing and integrating scalable, secure, and compliant technology solutions that meet business needs and architectural standards.
- Proficiency in **governance and compliance activities**, including communicating architecture strategies to diverse audiences and providing regular updates on architecture initiatives.
- Skilled in creating and maintaining detailed documentation, including architecture models and standards, and delivering training for knowledge transfer.
