Salesforce Lead Tester (Salesforce Certification Required)

Description

We are looking for a Lead Tester for a remote project with our State Client. On-site work at client's office maybe required upon request.

Qualifications

Mandatory Qualifications:

- Certification in Salesforce
- 3+ years of hands-on experience testing and overseeing the testing of a Salesforce based system, with different software development life cycles (e.g., waterfall, iterative) and contemporary software quality assurance processes and automated tools.
- 3+ years of experience using testing tools such as SoapUI, QuickTestPro (QTP), Application Life Cycle Management (ALM), Postman, JIRA, Azure Dev Ops, IBM Rational, or equivalent.
- 3+ three years of total combined experience developing and maintaining Quality Assurance Test Plans, User Acceptance Test Plans and performing system functional and user acceptance testing with each of the following: Salesforce based applications, business rules, and Restful API's.
- 1+ year of experience testing with various Internet browsers (Internet Explorer, Firefox, Google Chrome, etc.).
- 3+ years of experience in test case scenario development to perform positive and negative testing of requirements maintaining forward and backwards traceability.
- 3+ years of experience identifying and documenting test results, discrepancies between approved design documents and application performance, and managing defect lifecycle.
- A minimum of one year of experience testing role-based security.
- 2+ years of experience testing applications with multiple stakeholders/customers with varied business priorities and varying levels of experience with automation systems.
- 3+ years of experience coordinating and collaborating with a Systems Integrator System Testing team and development team.
- 5+ years of experience developing, measuring, and maintaining test matrices for coverage, velocity, and overall system quality.
- 5+ years of experience leading/managing a team with the responsibility for making work assignments to attain project goals and evaluating performance.
