Senior Data Analyst

Description
Lume Consulting Group a Sacramento based IT consulting company is looking for a qualified individual to fill the role of a Senior Data Analyst

Qualifications
Mandatory Qualification

• Minimum of five (5) years of experience as a data analyst or in other quantitative analysis or related disciplines, such as researcher, data engineer or BI analyst.
• Possession of a bachelor's degree. Additional qualifying experience may be substituted for the required education on a year-for-year basis.

Desirable Qualifications

Four (4) years of Senior Data Analyst experience performing the following database tasks:

• Analyzing Structured Query Language (SQL) Server database structures, data, and implementations to identify any potential security, performance, or support concerns.
• Recommending changes to improve security, performance, availability, and ease of access to PDR system data.

• Experience creating secure databases that comply with State Information Security protection requirements, at the database level.
• Modifying legacy databases to meet security requirements, and improve performance, availability, and data access.
• Converting/migrating legacy data into new database structure and participate in verifying application-database functionality.
• Participating in configuration, migration, troubleshooting and remediation activities.
