Senior Oracle Database Administrator (DBA)

Description

Lume Consulting Group a Sacramento based IT consulting company is looking for a Senior Oracle Database Administrator (DBA)

Job Description: The Senior Oracle DBA will be responsible for a wide range of database administration tasks including but not limited to:

- Performing patching, upgrades, installations, and maintenance of Exadata Oracle databases.
- Managing backup, capacity planning, and disaster recovery operations for Oracle databases.
- Advising the client on partitioning, storing, and managing Oracle databases efficiently.
- Executing Disaster Recovery processes for Oracle databases as needed.
- Troubleshooting failures, production outages, and conducting root cause analysis.
- Knowledge transfer, training, and mentoring of client staff in Oracle database technologies.
- Providing expertise in Oracle 19c, ASM, RAC, database tuning, and database partitioning.
- Specializing in Compute Cloud at Customer (OC3) and Oracle Private Cloud at Customer (OPCC).
- Handling installation and configuration of Oracle Golden Gate software.
- Installing Oracle Data Integrator (ODI) agents and managing ODI jobs.
- Leading Exadata Cloud at Customer upgrades from X8 to X10.

Qualifications

Mandatory Qualifications:

- Proven experience in creating and updating web-servers, Oracle report servers, **Oracle Analytics Server (OAS)**, **Oracle Linux OS**, and **Oracle RDBMS.**
- Capability to make changes and manage **Exadata Cloud** at Customer environments.
- Proficiency in managing **Oracle Enterprise Manager Grid Control**.
- Demonstrated ability to manage Oracle databases across various environments.
- Experience in developing new applications and improving existing applications.
- Expertise in creating detailed documentation for upgrades, patches, migrations, performance issues, and troubleshooting tasks.
- Conducting walkthroughs and knowledge transfers with client's development and testing staff.
- Familiarity with setting up a **two-node RAC** and an **Oracle Grid** Infrastructure installation.
- Leading database migration efforts from **Exadata Cloud** at Customer (X8) to (X10).
- Assisting with migrations from **Oracle Private Cloud at Customer (OPCC)** to **Compute Cloud at Customer (C3).**
