

Software Engineer

Description

Lume Consulting Group a Sacramento based IT consulting company is looking for a qualified individual to fill the role of a Software Engineer

Qualifications

Mandatory Qualification

- Minimum of five (5) years of experience in electronic data processing systems study, design, and programming. At least three (3) years of that experience must have been in a lead capacity.
- Possession of a bachelor's degree in an IT-related or Engineering field. Additional qualifying experience may be substituted for the required education on a year-for-year basis.

Desirable Qualifications

Five (5) years of Software Engineer experience performing the following tasks:

Performing and collaborating on analysis with other technical staff to inventory and document issues such as:

- Unsupported Microsoft .NET frameworks and platforms (e.g., .NET 2.0)
- Unencrypted communications between system components
- Unpatched 3rd party dependencies (e.g., jQuery)
- User credentials in code
- Dependencies on other deprecated components
- Dependencies on peripheral components or applications which could be impacted or create impediments to migrations.

Participating with other resources on analysis of security and other considerations (performance, supportability, availability, etc.) for remediations.

Developing approaches and plans to remediate technical issues.

Validating remediation approaches and plans with stakeholders.

Assisting in creating remediation plan/schedule and performing development activities per plans.

Performing build pipeline implementation(s).

Update work items and other documentation in ADO
