Technical Project Manager (PMP)

Description

Lume Consulting Group a Sacramento based IT consulting company is looking for a qualified individual to fill the role of a Technical Project Manager

Qualifications

Mandatory Qualification

- Minimum of five (5) years of broad, extensive and increasingly responsible Project Manager project experience applying project management principles, methods, techniques, and tools. At least three (3) years of that experience must have been in a lead capacity.
- Possession of a bachelor's degree. Additional qualifying experience may be substituted for the required education on a year-for-year basis.
- Possession of a valid Project Management Professional (PMP) certification from the Project Management Institute (PMI).

Desired Qualification

Four (4) years of Project Management experience performing the following tasks:

- Developing analysis and remediation activity plans, including scope and schedule, with inputs from technical resources.
- Experience as a Project Manager developing custom Microsoft .NET Web-based applications and knowledge of .NET programming.
- Developing communications and stakeholder management plans and communicate and coordinate with all stakeholders, SMEs, and customers via meetings and communications channels.
- Validating plans and activities with stakeholders.
- Tracking performance and progress of technical resources against baseline plans.
- Publishing status reports of the progress of management activities (such as task completion, schedule deviation, resource usage, and budget), and the technical activities (such as code modules updated, testing completion and coverage, test results, defects, and rework) through leveraging Azure DevOps (ADO) reporting capabilities to provide status reports to the extent reasonable.
